Second Part 3½ Minutes
June 11, 1945
No. 24

1. MUSIC: UP AND UNDER
2. ANNOUNCER: Radio station _____ presents...FOOD FRONT HEADLINES...a behind-the-scene story on how our food moves from farms to battle lines...from ships to Allied supply depots...from grocery shelves to civilian tables...and here with the latest dope on our wartime food supply is _____, War Food Administration's district representative, What's the paper and pencil for, _____? Figuring where you're going to get a T-Bone?
3. DIST. REP: Might be, _____. Can't ever tell.
4. ANNOUNCER: If you have any luck, let me know.
5. DIST. REP: Sure will. Might let other people in on it, too.
6. ANNOUNCER: Oh-h-h. So it's no secret then.
7. DIST. REP: No, it's no secret. In fact, the paper's been full of it lately. What people are wanting to know is, How does it operate? When does it begin? And that sort of thing.
8. ANNOUNCER: OK, when does it begin?
9. DIST. REP: I understand everything's set up now and ready to go. 'Course a lot depends on when cattle are finished and ready for market.
10. ANNOUNCER: I get it. You're leading up to the cattle feeder subsidy program which is expected to increase beef production and get more meat on civilian tables...More T-Bones maybe.

1. 1990年12月25日，在“九七”香港回归前夕，香港各界人士纷纷发表文章，讨论香港回归后的前途。其中，有人提出“一国两制”是解决香港问题的唯一途径。

100

1. *Chlorophyll a* (Chl *a*)

11. DIST. REP: Exactly. It was announced by War Mobilizer Fred M. Vinson about the middle of May.
12. ANNOUNCER: And under the program, subsidy payment will be made direct to cattle feeders.
13. DIST. REP: Yes, it's the first subsidy on meat production made directly to feeders. And should encourage them to feed more cattle to heavier weights. Then, too, the way the program operates it'll send more meats to federally inspected meat plants.
14. ANNOUNCER: Which means more meats will start moving through regular trade channels and on to civilian tables. Let's get on with actual operations. Who gets the subsidy and so forth.
15. DIST. REP: The payment is 50 cents a hundred, live weight, on Good and Choice cattle weighing 800 pounds or more.
16. ANNOUNCER: And the feeder gets this payment direct?
17. DIST. REP: He does if he's owned the cattle at least 30 days prior to the date they're sold...sells to a legally authorized slaughterer, at not less than the minimum stabilization price for his zone.
18. ANNOUNCER: This minimum price is \$14.25 per hundred, Chicago, but varies by zones throughout the country.
19. DIST. REP: That's right. And the feeder must get this price to be eligible for the payment. That's one of the requirements.
20. ANNOUNCER: You mentioned authorized slaughterers. I take this to mean someone operating under federal inspection.

21. DIST. REP: That, or a permit or license issued by OPA. Either one's OK.
22. ANNOUNCER: Now about the payments. Let's go into that.
23. DIST. REP: All right. They'll be made through county Triple-A committees, the same as dairy production payments are. Before any payments will be made, however, certain written evidence must be presented by feeders.
24. ANNOUNCER: Such as when and where the cattle were sold...the name of the buyer they were sold to...what authorized slaughterer they'll be delivered to...number of head...total liveweight...and how much they brought.
25. DIST. REP: That's right. All of this will be needed. It can be certified by sales receipts, invoices, scale tickets or other written evidence from the buyer. In addition, if the feeder didn't raise the cattle himself he must show when he bought them, and the name of the person he bought them from. He also may be required to show evidence the subsidy hasn't been made previously on the same cattle. 'Course, if he raised the stuff himself, this latter certification won't be necessary.
26. ANNOUNCER: When all of the evidence is brought up-to-date, then it's filed in the county Triple-A office.
27. DIST. REP: Yes, in the county where the feeder's ranch, or his farm, or feedlot is located.

1940

28. ANNOUNCER: I see. Suppose all this evidence is turned in and meets all necessary requirements. Where do we go from there?
29. DIST. REP: A sight draft will be issued on the account of the Commodity Credit Corporation...the same as dairy production payments are...and that's about all there is to it, generally speaking.
30. ANNOUNCER: Except for getting the cash. The sight draft will be cashed by any bank, I suppose.
31. DIST. REP: Absolutely.
32. ANNOUNCER: Suppose I'm a feeder-slaughterer. That is, I buy from someone else, finish them and then do my own slaughtering. Where do I come in? Or do I?
33. DIST. REP: A feeder-slaughterer is eligible for subsidy payments, the same as a regular feeder.
34. ANNOUNCER: Provided proper evidence is presented.
35. DIST. REP: Yes. Provided no subsidy has already been made on the cattle. Provided, too, he's owned them 30 days or more...that they weighed at least 800 pounds...and dressed out A or Double-A. He also must state who he bought them from...the price he paid...and the weight at the time of purchase.
36. ANNOUNCER: I see. And this evidence is also presented to the county Triple-A office.

The first part of the report is devoted to a description of the work done during the year. It is divided into two main sections: a general summary of the work and a detailed account of the results of the various experiments. The general summary is given in the first section, and the detailed account is given in the second section.

The general summary is given in the first section, and the detailed account is given in the second section. The general summary is given in the first section, and the detailed account is given in the second section.

The detailed account is given in the second section, and the general summary is given in the first section. The detailed account is given in the second section, and the general summary is given in the first section.

The general summary is given in the first section, and the detailed account is given in the second section. The general summary is given in the first section, and the detailed account is given in the second section.

The detailed account is given in the second section, and the general summary is given in the first section. The detailed account is given in the second section, and the general summary is given in the first section.

The general summary is given in the first section, and the detailed account is given in the second section. The general summary is given in the first section, and the detailed account is given in the second section.

37. DIST. REP: Yes. He may collect payment also on cattle he raises himself which meet the feeder-slaughterer requirements at the time of slaughter. Here's a point I was about to forget. This program went into operation May 19. Subsidy payments hold good for cattle sold on or since that date, provided, of course, requirements have been met.
38. ANNOUNCER: As I see it there are several points of eligibility... Cattle must weigh 800 pounds or more at the time of sale... They must have been owned for at least 30 days... They must be sold to a legally authorized slaughterer... They must grade Good or Choice or the carcass grade A or Double-A... They must bring not less than the minimum price for these grades by local zones. Thanks, _____, for being with us today. Listen next _____ to FOOD FRONT HEADLINES... presented as a public service feature by Radio Station _____ in cooperation with War Food Administration, to bring you inside facts from authoritative sources about what's happening on the agricultural firing line.

NOTE TO DISTRICT REPRESENTATIVE: IF YOU
HAVE MORE THAN FIVE MINUTES, CUT CUE NO.
37 AND CONTINUE WITH CUE NO. 39.

39. DIST. REP: Yes, and then he's in line for his subsidy. He may collect payment also on cattle he raised himself which meet the feeder-slaughterer requirements at the time they're slaughtered.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

[illegible][illegible]

40. ANNOUNCER: When we first started out awhile ago, _____, you said the program got underway about the middle of May. Suppose I've sold some cattle since then?
41. DIST. REP: In that case, you'd be eligible for the payment. Provided, of course, you meet the specifications we've been talking about.
42. ANNOUNCER: Well, yes, I understood that. From what date in May though?
43. DIST. REP: On or since the nineteenth, as long as authorized funds for payments are available.
44. ANNOUNCER: The money's already appropriated, isn't it?
45. DIST. REP: Yes, 40-million dollars.
46. ANNOUNCER: Now, another thing. You keep talking about cattle weighing 800 pounds. Do all cattle have to come within this weight range?
47. DIST. REP: No, they don't. Just so the average weight of a drove and average price paid are OK. Cattle of similar weight and grade should be weighed and priced separately though.
48. ANNOUNCER: Well, yes. I know some people, _____, who sell by the head and not necessarily by weight. What about them?
49. DIST. REP: They'll get the payment, provided the cattle are weighed later and the total price received is divided by the total weight....
50. ANNOUNCER: In that case, the minimum price and weight must check out and the length of ownership requirements met.

51. DIST. REP: That's right.
52. ANNOUNCER: As I see the program, there are about five points of eligibility which must be met.
53. DIST. REP: Generally speaking, that's correct. First thing, cattle must weigh 800 pounds or more at the time they're sold.
54. ANNOUNCER: Next, they must have been owned by the seller at least 30 days before they're sold.
55. DIST. REP: They must be sold to an authorized slaughterer...Someone operating under federal inspection or under a permit or license issued by the Office of Price Administration.
56. ANNOUNCER: Cattle must grade out Good or Choice, or the carcass grade out A or Double-A.
57. DIST. REP: And last but not least, the cattle must bring not less than the minimum price for these grades in the zone of sale.
58. ANNOUNCER: Suppose, _____, something comes up a cattle feeder wants to know a little more about. Where can he get this information?
59. DIST. REP: From his Triple-A office. They're the folks handling the written evidence and issuing the sight drafts...so I'd say they're the ones to see.
60. ANNOUNCER: If the program works out as it's expected to, we ought to see some change in our meat supply sometime soon, don't you think?

1. The first part of the report deals with the general situation of the country.

2. The second part deals with the economic situation.

3. The third part deals with the social situation.

4. The fourth part deals with the political situation.

5. The fifth part deals with the cultural situation.

6. The sixth part deals with the military situation.

7. The seventh part deals with the foreign relations.

8. The eighth part deals with the internal security.

9. The ninth part deals with the public health.

10. The tenth part deals with the education.

11. The eleventh part deals with the justice.

12. The twelfth part deals with the finance.

13. The thirteenth part deals with the labor.

14. The fourteenth part deals with the agriculture.

15. The fifteenth part deals with the industry.

16. The sixteenth part deals with the commerce.

17. The seventeenth part deals with the transportation.

18. The eighteenth part deals with the communication.

19. The nineteenth part deals with the public works.

20. The twentieth part deals with the public administration.

21. The twenty-first part deals with the public safety.

22. The twenty-second part deals with the public order.

61. DIST. REP: That's one of the main reasons the program was set up. As far as the over-all meat supply is concerned, there probably won't be any increase for at least the next three months, but distribution ought to work out a little better.
62. ANNOUNCER: That's because more meat will be channeled into federally inspected plants which can ship supplies across state lines.
63. DIST. REP: That's right. As more meat goes into federally inspected plants, more meat will start moving from one part of the country to another. This should improve the whole pattern of distribution for civilians.
64. ANNOUNCER: Maybe we will get that T-Bone you were figuring on awhile ago.
65. DIST. REP: Might do it. Distribution has been a big problem all the time. As far as total beef slaughter is concerned, so far this year more cattle have been slaughtered than for the same period last year.
66. ANNOUNCER: But even greater beef production is needed.
67. DIST. REP: Yes it is. It's needed to help offset present heavy demands for meats and also the drop in hog slaughter during the past marketing year.

68. ANNOUNCER: And this is what the feeder subsidy program is set up to do...encourage farmers to feed more cattle to heavier weights...and to improve distribution of beef by directing more cattle to legally authorized slaughterers who deliver through regular trade channels. Thanks, _____, for being with us today. Listen next _____ to FOOD FRONT HEADLINES...presented as a public service feature by Radio Station _____ in cooperation with War Food Administration, to bring you inside facts from authoritative sources about what's happening on the agricultural firing line.

The first part of the paper is devoted to a general discussion of the problem. It is shown that the problem is of great importance in the theory of the structure of the atom. The second part is devoted to a detailed analysis of the results of the experiments. It is shown that the results are in good agreement with the theoretical predictions. The third part is devoted to a discussion of the results of the experiments. It is shown that the results are in good agreement with the theoretical predictions. The fourth part is devoted to a discussion of the results of the experiments. It is shown that the results are in good agreement with the theoretical predictions. The fifth part is devoted to a discussion of the results of the experiments. It is shown that the results are in good agreement with the theoretical predictions. The sixth part is devoted to a discussion of the results of the experiments. It is shown that the results are in good agreement with the theoretical predictions. The seventh part is devoted to a discussion of the results of the experiments. It is shown that the results are in good agreement with the theoretical predictions. The eighth part is devoted to a discussion of the results of the experiments. It is shown that the results are in good agreement with the theoretical predictions. The ninth part is devoted to a discussion of the results of the experiments. It is shown that the results are in good agreement with the theoretical predictions. The tenth part is devoted to a discussion of the results of the experiments. It is shown that the results are in good agreement with the theoretical predictions.
